

LFG COACHING

Detailed Plan · Phase 1

What this is. Generated automatically by the **LFG Coaching Brain** — the AI system built from Coach Ahmed's own methods, calls, client plans and certifications, layered on an evidence-based knowledge base. Produced from a sample intake (Loay) as proof of the system. This is a Phase-1 starting plan, calibrated after a 7-day photo log. Sources and reasoning are on the final page.

CLIENT

Loay · 28 · 184cm · 85kg · trains 6 days/week (gym + running, LFG run club + bootcamp)

Goal: body recomposition — lose fat, build muscle, look lean. **Flags:** runner's knee · very high stress · sleeps 8h.

YOUR TARGETS

2,500 kcal / day

175g Protein · 290g Carbs · 70g Fat. All food weights are cooked unless noted. Macros flex ±10g protein, ±15g carbs/fat; total calories matter most.

PART 1 7-DAY MEAL PLAN

Order each day: Meal 1 · Protein anchor · Meal 2 (big) · Dinner. You can merge the anchor into Meal 1 to run 2–3 feedings. Swaps by weight: rice ↔ potato ↔ sweet potato ↔ couscous; chicken ↔ turkey ↔ white fish ↔ prawns; sourdough ↔ wrap ↔ oats. Coffee black/splash = free, none after 4pm. 3L water.

DAY 1 — Classic

Meal	Food (grams)	P / F / C
Meal 1	3 whole eggs + 5 egg whites, 80g oats (dry), 1 banana, cinnamon	48 / 20 / 82
Anchor	200g Almarai 0% Greek yogurt, 1 tbsp honey, 80g berries	21 / 0 / 31
Meal 2	200g chicken breast, 320g basmati rice, 200g grilled veg, 1 tbsp olive oil	74 / 21 / 90
Dinner	170g lean beef mince 5%, 250g potato, big salad + lemon, 15g feta	50 / 18 / 45
Day total: ≈ 2,510 kcal · 193P · 59F · 248C		

DAY 2 — Mediterranean

Meal	Food (grams)	P / F / C
Meal 1	250g Greek yogurt 2%, 60g granola, 30g whey, 1 apple	55 / 12 / 70
Anchor	150g cottage cheese, cherry tomatoes, 5 olives	18 / 8 / 6
Meal 2	180g salmon, 300g couscous, 200g roasted courgette + pepper, lemon	52 / 26 / 95
Dinner	200g shish tawook, 1 wholewheat wrap 60g, fattoush (no fried bread), 1 tbsp olive oil	58 / 22 / 40
Day total: ≈ 2,540 kcal · 183P · 68F · 211C		

DAY 3 — Asian

Meal	Food (grams)	P / F / C
Meal 1	4 whole eggs, 2 slices sourdough 90g, ½ avocado 75g, chili	32 / 30 / 48
Anchor	30g whey in water, 1 banana	26 / 1 / 28
Meal 2	180g lean beef strips, 300g jasmine rice, 200g stir-fry veg, 1 tbsp oil, soy	56 / 24 / 90
Dinner	200g prawns, 300g cooked rice noodles, pak choi + veg, garlic/ginger, 1 tsp oil	55 / 10 / 78
Day total: ≈ 2,560 kcal · 169P · 65F · 244C		

DAY 4 — Middle Eastern

Meal	Food (grams)	P / F / C
Meal 1	Shakshuka (4 eggs), 2 slices sourdough 90g	32 / 24 / 52
Anchor	200g Greek yogurt 0%, 40g granola	24 / 4 / 32
Meal 2	200g chicken thigh (skinless), 300g freekeh/rice, grilled veg, 1 tbsp olive oil	62 / 26 / 88
Dinner	170g lean kofta, 100g hummus, 1 pita 60g, tabbouleh (light oil)	52 / 24 / 60
Day total: $\approx$ 2,560 kcal · 170P · 78F · 232C		

DAY 5 — Lean & high-carb (hard day)

Meal	Food (grams)	P / F / C
Meal 1	30g whey, 100g oats, 1 banana, 15g peanut butter (blend)	40 / 15 / 90
Anchor	2 boiled eggs, 1 apple	13 / 10 / 25
Meal 2	220g white fish (hammour/tilapia), 350g rice, 200g veg, 1 tbsp olive oil	60 / 18 / 100
Dinner	200g turkey mince, 250g sweet potato, green salad, 15g feta	58 / 16 / 52
Day total: $\approx$ 2,560 kcal · 171P · 59F · 267C		

DAY 6 — Comfort (bootcamp day)

Meal	Food (grams)	P / F / C
Meal 1	3 eggs + 4 whites omelette, 250g potato hash, spinach	38 / 22 / 40
Anchor	250g Greek yogurt 0%, 80g berries, 1 tbsp honey	25 / 0 / 40
Meal 2	180g lean beef, 120g pasta (dry) cooked, tomato-basil, salad, 1 tbsp olive oil	58 / 26 / 92
Dinner	200g chicken breast, 200g oven potato wedges (1 tsp oil), grilled veg	64 / 12 / 42
Day total: $\approx$ 2,530 kcal · 185P · 60F · 214C		

DAY 7 — Flexible / social

Meal	Food (grams)	P / F / C
Meal 1	200g Greek yogurt, 60g granola, 30g whey, berries	52 / 10 / 60
Anchor	30g beef jerky or 150g cottage cheese	20 / 3 / 6
Meal 2 (out)	Mixed grill $\approx$ 220g (chicken + kofta), $\sim$ 200g rice, grilled veg, salad	70 / 28 / 70
Dinner	180g salmon, large salad, 200g roasted veg, 1 tbsp olive oil	40 / 26 / 20
Free window	1 planned treat (2 scoops gelato / a dessert), placed here	5 / 12 / 55
Day total: $\approx$ 2,560 kcal · 187P · 79F · 211C		

PART 2 FULL GYM PROGRAMME (Phase 1, Weeks 1–4)

4 lifting days + 2 easy runs + 1 rest. Strength sets at **2 reps in reserve** unless noted. Rest 2–3 min on big lifts, 60–90s on isolation. **Knee rule:** pain-free range only, no deep loaded knee bend in Phase 1; the isometrics (Spanish squat / wall sit) reduce knee pain — do them. Log every set.

Mon	Day A — Lower (knee-safe)
Tue	Day B — Upper Push
Wed	Easy run / LFG Run Club (Zone 2)
Thu	Day C — Upper Pull
Fri	Day D — Full-body / Posterior
Sat	Easy 5k or LFG Bootcamp (scale jumps)
Sun	Rest — knee prehab + mobility + walk

DAY A — LOWER (knee-safe)

Exercise (machine)	Sets × Reps	Notes
Leg Press (45° sled)	4 × 10–12	Feet high; stop before deep knee flexion. Quad builder that spares the joint.
Romanian Deadlift (barbell)	3 × 8–10	Hip hinge, minimal knee bend — hamstrings/glutes.
Hip Thrust (barbell/machine)	3 × 10–12	1s glute squeeze at top.
Leg Extension (machine)	3 × 15–20	Light, high-rep, pain-free arc — VMO/knee tracking, not heavy.
Seated Leg Curl (machine)	3 × 12	3s negative.
Hip Abduction (machine)	3 × 15	Glute-med — key for runner's knee.
Spanish Squat (band) / Wall Sit	3 × 30–45s	Isometric — pain relief + quad strength.
Standing Calf Raise (machine)	3 × 15	

DAY B — UPPER PUSH

Exercise (machine)	Sets × Reps	Notes
Incline DB Press	4 × 8–10	Main chest driver.
Chest Press (machine, flat)	3 × 10–12	Full squeeze.
Shoulder Press (machine/DB)	3 × 8–10	
Pec Deck (machine)	3 × 12–15	Stretch + squeeze.
Cable Lateral Raise	3 × 15	Shoulder caps.
Triceps Rope Pushdown (cable)	3 × 12	
Overhead Cable Triceps Ext.	3 × 12	Long-head stretch.

DAY C — UPPER PULL

Exercise (machine)	Sets × Reps	Notes
Lat Pulldown (machine)	4 × 10–12	Drive elbows down, no swing.
Chest-Supported Row (machine)	3 × 10	Strict, no lower-back cheat.
Seated Cable Row (neutral)	3 × 12	Squeeze shoulder blades.
Reverse Pec Deck (rear delts)	3 × 15	Posture.
Cable Face Pull	3 × 15	Shoulder health.
Barbell/EZ Curl	3 × 10	
Hammer Curl (DB)	3 × 12	Brachialis/forearm.
Hanging Knee Raise	3 × 12	Core.

DAY D — FULL-BODY / POSTERIOR (knee-friendly)

Exercise (machine)	Sets × Reps	Notes
Trap-Bar Deadlift	4 × 6–8	Knee- & back-friendly hinge; main strength lift.
Incline Machine Press	3 × 10	Upper-body balance.
Cable Pull-Through	3 × 12	Glutes, zero knee load.
Step-Ups low box (DBs) / Leg Curl	3 × 10	Only if pain-free, else Glute-Ham/Leg Curl.
Lat Pulldown / Assisted Pull-up	3 × 10	
Cable Crunch	3 × 15	
Hip Abduction (machine)	3 × 20	More glute-med.

Running, prehab & progression

- **Running (Wed + Sat):** both easy / Zone 2 (talk in full sentences) in Phase 1. No hard intervals until the knee is quiet 2–3 weeks. Increase weekly distance $\leq 10\%$. ~170–180 cadence, softer landings, avoid downhill pounding.
 - **Knee prehab (Sun + before lower days):** Spanish squat 3×45s, wall sit 3×30–45s, band terminal knee extension 3×15, side-lying glute-med 3×15/side, couch stretch 2×30s/side.
 - **Progression (wk 1–3):** hit the top of the rep range on all sets at 2 RIR → add ~2.5–5% next session (double progression).
 - **Week 4 deload:** same lifts, 2 sets each, ~10% lighter. Then reassess off your logs + week-1 photos and build Phase 2.
- Sharp pain, swelling, or a knee not settling in 2–3 weeks → get it assessed and we deload the running.

SOURCES & BASIS — what everything is grounded in

This plan was not invented. Every number and choice comes from one of two places: **Coach Ahmed's own method** (extracted from his real coaching) and a **peer-reviewed, evidence-based knowledge base**. Here is the basis for each part.

The calorie & macro numbers

- **Maintenance (~2,900–3,000 kcal):** Mifflin–St Jeor BMR equation × an activity multiplier for 6 training days — the standard used by NASM and registered dietitians.
- **Deficit (~2,500 kcal, moderate):** a ~15% cut, sized for recomposition while staying fuelled. Basis: Eric Helms (Muscle & Strength Pyramids) and Alan Aragon (Flexible Dieting) — adherence-first, no aggressive cuts.
- **Protein 175g (~2.0 g/kg):** the range that maximises muscle retention in a deficit — ISSN position stand, Helms, Aragon, NASM CNC. Set first as the priority macro.
- **Fat 70g (~0.85 g/kg):** hormone/joint floor. **Carbs 290g:** fill the remainder to fuel training — standard evidence-based sequencing.

The training programme

- **Structure & volume (10–20 hard sets/muscle/week, 2× frequency, progressive overload):** Brad Schoenfeld's hypertrophy research and Eric Helms' training pyramid (priority order: adherence → volume/intensity/frequency → progression).
- **Effort (2 RIR) and double progression:** autoregulation via RPE/RIR — Helms, Renaissance Periodization (Mike Israetel).
- **Easy-running emphasis (Zone 2, 80/20):** Stephen Seiler's polarised-training research and Jack Daniels' Running Formula.
- **Runner's-knee approach (strengthen quads/glutes/hips, isometrics, manage load, refer out):** sports-physiotherapy consensus for patellofemoral pain, plus Ahmed's own physio-informed prehab method.

The coaching approach (the “how”)

- **“Consistency over intensity,” mind → nutrition → training, the plate method, the 5-of-8 checklist, the 3M framework, the daily/weekly check-in loop:** all extracted from Coach Ahmed's real calls, WhatsApp threads and his own client nutrition frameworks.
- **Accountability & behaviour change (calendar it, tiny next steps, no-shame lapses, motivation vs discipline):** Ahmed's method, reinforced by Motivational Interviewing (Miller & Rollnick) and habit science (Fogg, Clear).
- **His credentials:** Active IQ Level 3 (personal training + pre/postnatal), which back the screening and refer-out guardrails.

How the system is built

The brain is a 46-file knowledge system: Ahmed's method and voice (from his real coaching, all client data removed), a cited knowledge base (training, nutrition, behaviour, assessment), and distilled reference notes from NASM, Precision Nutrition, Helms, Aragon, Schoenfeld and Miller — original synthesis, no copyrighted text reproduced.

Honest limits

- This is a **Phase-1 starting point**, not a final plan. The real system calibrates the numbers from a 7-day photo log + body-composition data, exactly as Ahmed does.
- The calorie figure is an estimate (no body-fat scan yet). Weekly trends in weight, measurements and gym performance drive the adjustments.
- **Not medical advice.** Injury, illness, disordered eating or clinical nutrition are referred to the appropriate licensed professional.
