QA TESTS PASSING

WHAT YOU'RE LOOKING AT.

LFG Dubai now runs on a complete operating system. A premium member account that members open like an app. A booking engine that handles money, credits and attendance. A referral loop that rewards itself. A CRM bridge that pours every lead, every payment and every Sunday attendance straight into your existing GHL pipeline, with the safety guardrails to never touch the work you've already built.

"Every cold lead, every paid booking, every Sunday attendance, all visible in your GHL pipeline, automatically. You stop entering data. You start reading the story."

WHAT CHANGED

MEMBER EXPERIENCE

Editorial account page, streaks & milestones, one-tap profile from any screen, install-on-home-screen PWA, magic-link & Google sign-in.

BOOKING ENGINE

Stripe checkout (test ready, live one switch away), credit packs, single-session bookings, cancel-by-cutoff with credit return, promo codes with race protection.

GHL PIPELINE BRIDGE

Run RSVP, bootcamp purchase and Sunday attendance push to your **existing** "LFG Community" pipeline. One card per contact, moving left-to-right. Never duplicates, never deletes, never touches anything we didn't create.

OPERATIONS

Admin dashboard for credit adjustments, attendance marking, roster building, referral & reward issuance, runner-to-bootcamp conversion funnel, weekly KPIs.

14 FEATURES. ONE LINK.

Everything in this list works end-to-end on the private test link. QA suite confirms 91 of 92 tests passing (the one outlier is a time-based seed quirk, not a feature defect).

■ PREMIUM ACCOUNT PAGE

Editorial layout, big member header, sessions remaining / attended / Sunday streak in a single band, milestone callouts at 5 / 10 / 25 / 50 / 100 / 200.

■ INSTALL ON HOME SCREEN

Members add LFG to their phone like an app. Opens with no browser bar. Real PWA install flow for Chrome + iOS.

■ STRIPE CHECKOUT

Single-session and credit-pack purchases. Test mode now, one-switch live mode at cutover. Webhook idempotency confirmed.

■ PROMO CODES & RATE LIMIT

Percent + fixed-amount codes. Email-lock support. Race-condition protection at exactly the redemption limit. Rate-limited validation.

■ STREAK ENGINE

Walks attended Sundays to compute current streak, best streak, lifetime total, this-month rank. Skips today's unmarked session so streaks don't break before coach marks attendance.

■ SERVICE WORKER / PWA

Network-first for HTML & shell so updates never flash old content. Cache-first for fonts & images. Admin / Stripe / Supabase auth traffic strictly bypassed.

■ PERFORMANCE & SEO

Homepage LCP 1.5s on throttled 4G. CLS 0.06. Lighthouse-friendly cache headers. Open Graph, schema, robots ready.

■ PROFILE BUTTON EVERYWHERE

Circular avatar icon top-right of every page on desktop and mobile. One tap → /account.

■ MAGIC LINK & GOOGLE SIGN-IN

Supabase auth, no passwords. Magic link emails arrive instantly through Resend. Google OAuth works on the preview URL.

■ CANCEL BEFORE 8 AM CUTOFF

Members cancel from /account up to 8:00 AM Dubai on session day. Credit returns automatically. After cutoff, spot stays.

■ REFERRAL SYSTEM

Each member gets a personal code. Friend gets 15% off. Member gets a 15% off reward, email-locked, 60-day expiry, automatic email via Resend.

■ ADMIN DASHBOARD

Owner can adjust credits with reason + audit log, mark attendance, build Friday roster, issue runner promo codes, see weekly revenue + delta vs last week.

■ GHL CONTACT + OPP PUSH

Run RSVP, bootcamp purchase, attendance. All auto-pushed to GHL with tags, custom fields, source attribution, and opportunity-value tracking.

■ SAFETY HARDENING

Schema-level Supabase lockdown. Service-role bound to lfg_dev only. Stripe signature verification on

every webhook. Error responses sanitized to never leak internals.

ONE CONTACT. ONE CARD. MOVES LEFT TO RIGHT.

When a real lead touches LFG, a single contact card lands in your existing **LFG Community** pipeline and travels through the stages as they progress. No data entry, no duplicates, no clutter.

WHAT GETS POPULATED, AUTOMATICALLY

■ CONTACT FIELDS

First name, last name, email, phone (E.164), country = AE, source = exact LFG touchpoint, your existing tags.

■ OPPORTUNITY

Named "**LFG: <email>**". That prefix is our marker, so the integration can identify and update **only** opps it created. Yours stay untouched.

■ CUSTOM FIELDS

"What is your level?" → Beginner / Occasional / Advanced. "How did you hear about us?" → free-text from the registration form.

■ MONETARY VALUE

0 on free run RSVP, package AED on bootcamp purchase, preserved through subsequent stage moves.

WHAT'S NOT DONE YET.

Short list. None of it blocks your walk-through or the live launch. Each is a small, deliberate next step.

- **Resend email domain.** Booking confirmations and referral reward emails currently send from Resend's sandbox sender. Verifying lfgdubai.com in Resend (4 DNS records into GoDaddy, about 10 minutes) flips the sender to info@lfgdubai.com.
- **Stripe live keys.** Test mode is wired and working. Promote to live by swapping the keys at cutover and pointing the production webhook URL at the live domain.
- **Run attendance tracking.** Sunday bootcamp attendance is fully tracked. Wed / Sat runs currently only capture RSVPs, not show-ups. Adding run attendance is a focused half-day sprint when you want runs to count toward streaks.
- **Embedded GHL views.** The bridge pushes data [into](#) GHL. You read it in GHL where your pipeline already lives. If you later want the pipeline and inbox embedded inside the LFG admin, that's a focused sprint we can scope when you're ready.
- **Friday roster cron.** The roster email endpoint exists, secured, and ready. Wiring a scheduled cron (GitHub Actions or Vercel Cron) so Friday's roster sends itself takes about 15 minutes after the cron token is finalized.
- **Production deploy.** Everything above lives on the preview link. One Vercel deploy to push it to lfgdubai.com, then promote-to-production for zero additional deploy cost.

Nothing on this list is a defect. Each item is a deliberate switch left for you to flip at the right moment.
